Introduction to Overhead Non-Imaging Infrared (OPIR) is organized into five modules, each one complementing the other to give the audience a logical procession through the different facets of OPIR. This course begins with a basic definition of MASINT and OPIR, and a description of the OPIR sensors. From there, the course illustrates how those sensors collect IR energy. After the audience understands what the sensors are and how they work, the course explains how the sensors are tasked and how the analysts on the ground process, exploit, and disseminate this data. This course concludes with some examples from the different mission areas OPIR helps support and an introduction to the various off-line and near real time products derived from OPIR data collected by the different sensors.</p> <p>Cost: 0.00 Length: 3.00 User Rating: N/A Status: --</p> <p>▶ NGA - COM1301e Critical Thinking Fundamentals (U)</p> <p>Description : Critical Thinking Fundamentals (COM 1301e) is an interactive web-based training (WBT) course designed to examine the process of critical thinking. Through a series of instructional modules and interactive exercises, students gain an understanding of the concepts and principles of critical thinking and how to use a structured method to explore alternative solutions as part of problem solving.</p> <p>Cost: 0.00 Length: 4.00 User Rating: N/A Status: --</p> <p>▶ NGA - Worldly Knowledge (U)</p> </div>

Calendar of Offerings

If you are looking for instructor-led training on a specific date, the Calendar of Offerings lists scheduled offerings in a calendar format. Click the blue subject area links to view the specific offerings. Yellow ellipsis icons indicate more listings.
